New cars, new demands

As cars have changed over the past 30 years, the demands placed upon wipers have also changed. Taller, more steeply raked windshields, higher speeds and more aerodynamic designs required a shift in technology. The conventional metal blade 'bridge' wipers that were standard not so long ago could no longer meet the vehicle manufacturer's and consequently the driver's expectations.

For these reasons the technology had to change. The conventional wiper has been largely overtaken by the more dynamic flat blade wiper.

CHAMPION leads this development in close collaboration with the vehicle manufacturers. Today CHAMPION brings this technology level to the Aftermarket to serve all customer demands. You can even install our modern flat blades on cars originally equipped with conventional blades.

CHAMPION's Research & Development Centre in Aubange/Belgium recently won a coveted PACE award for the Bayonet Connection System for Flat Blades.

This technology has emerged as the industry standard for flat blade connection systems; the system provides rapid, cost-effective and simple wiper blade replacement and is featured on more than 20 vehicle platforms worldwide.

Quality In Everything We Do

TRE Transportation Research Center Inc.

The ingenious Master Connector is used extensively on the CHAMPION flat blade program.

CHAMPION's Master Connector™

CHAMPION has developed a **patented wiper blade connector** system for the Aftermarket, the so-called Master Connector. It enables replacement of the wiper regardless the wiper arm originally mounted on the car using a **wide range of specific adaptors**, which simply clip onto the Master Connector base.

The CHAMPION range offers everything you need!
